Education

Pimpri Chinchwad College Of Engineering Pune

Bachelor of Technology

Nov. 2022 – Aug. 2026

Pune, Maharashtra

Relevant Coursework

- | | | | |
|--------------------|-----------------------|---------------------|-------------------|
| • Data Structures | • OOPS | • Software Testing | • Algorithms |
| • Operating System | • Database Management | • Computer Networks | • Web Development |

Experience

Sears - SDE Intern

Jan 2026 – Present

- Integrated REST APIs into frontend components to fetch and manage application data using React.
- Developed responsive frontend pages and implemented efficient client-side logic for dynamic data rendering.
- Implemented unit tests using Vitest, improving reliability and maintainability of frontend components.
- Created and configured technical offers for the rewards system, enabling automated promotional and incentive campaigns.
- Collaborated with cross-functional teams using Git-based workflows for feature development and code reviews.

GeeksforGeeks - DSA Mentor Intern

Aug 2025 – Sept 2025

- Guided 50+ learners in mastering Data Structures & Algorithms with strong focus on coding interviews.
- Delivered 1:1 mentorship and group sessions on problem-solving, competitive programming, and optimization techniques.
- Helped reduce average problem-solving time by 30% through structured practice and personalized feedback.
- Explained competitive programming and interview-based problems, boosting students algorithmic thinking.

Achievements and Rankings

- ICPC Asia West Regionalist 2025 Rank 272 and achieved All India Rank 323 in ICPC Preliminary Round.
- Finalist in Coderush 4.0 International Hackathon (Competitive Programming + Technical), conducted by Indus Valley Partners.
- Earned 4-Star Rating on CodeChef with a peak rating of 1802, ranked among the top 2% of Indian users.
- Achieved the title of Expert on Codeforces with a maximum rating of 1639.
- Attained a LeetCode rating of 1800+, ranking in the top 4% globally, and 1900+ rating at GeeksforGeeks.

Projects

ShareMeal | *MongoDB, Express.js, React.js, Node.js*

- Developed a full-stack web platform that connects mess facilities with local NGOs to donate surplus food, ensuring seamless coordination and maintaining 99.9% data reliability across all transactions and users.
- Designed and deployed a fully responsive React interface that enables mess owners and agencies to register, authenticate, and efficiently manage donation activities through an intuitive dashboard.
- Optimized backend performance by integrating MongoDB with query response time below 300ms for storing donation logs, agency profiles, food availability schedules, and historical records.
- Implemented intelligent location-based filtering to match donors with nearby NGOs in real time, boosting resource utilization and speeding up food distribution during high-demand periods.

Lifeline Connect | *MongoDB, Express.js, React.js, Node.js*

- Built a MERN-based real-time platform connecting doctors with compatible blood donors during medical emergencies.
- Implemented role-based dashboards for doctors and donors to manage requests, availability, and donor participation securely.
- Designed a responsive UI enabling quick request posting and efficient emergency coordination.
- Integrated MongoDB to store donor profiles, blood groups, and request logs for fast and reliable data retrieval.

Technical Skills

Languages: C , C++, Java, JavaScript, SQL

Developer Tools: VS Code, Eclipse, IntelliJ IDEA

Technologies/Frameworks: Linux, GitHub, Express.js
